Claims 1-37 and 41-67 are allowed.

The following is an examiner's statement of reasons for allowance: claims 1, 33, 66 and 67 contain allowable subject matter for at least the reason that the prior art of record fails to teach or reasonably suggest an imaging system for high energy direct conversion scan imaging, or method therefor, or imaging system for high energy direct conversion scan imaging which is arranged to provide imaging data for generating plural tomographic image planes of an object from a single imaging scan operation or method therefore comprising a high energy radiation source member, semiconductor high energy radiation direct conversion imaging device including a plurality of imaging cells, each imaging cell being individually addressable and comprising a detector cell and a readout cell, the source member and/or imaging device arranged to move substantially continuously relative to an object position, wherein readout cells are operable to readout the individually addressable imaging cell output values at time intervals substantially
